Name	Status	Date modified	Type	Size
CMP_Assigment_DeltaY_Eslam_As...		11/22/2020 10:45 ...	VBScript Script...	4 KB

Note:

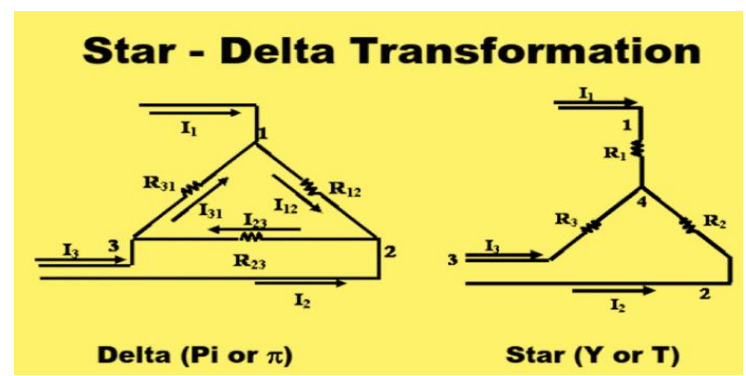

The antivirus will warn you when this message appear click on open.

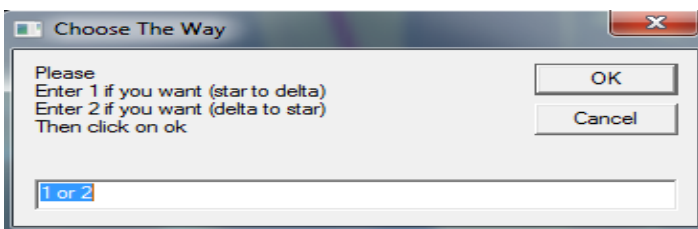

Make sure that the file open with Microsoft windows based script host.

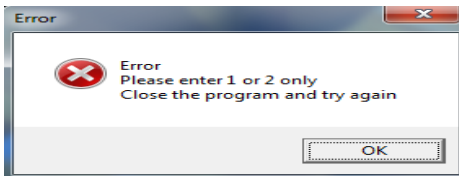

How the program work:

In the first you will choose if you want to transfer (star to delta) or (delta to star).

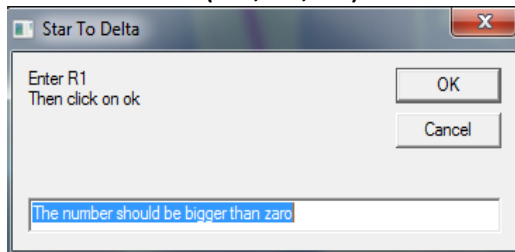

If you enter any thing else 1 or 2 you will have this message.

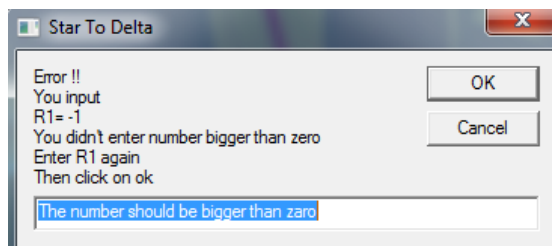

(STAR To DELTA)(1)

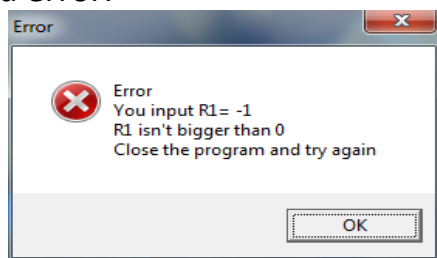

You will write the values(R1,R2,R3).

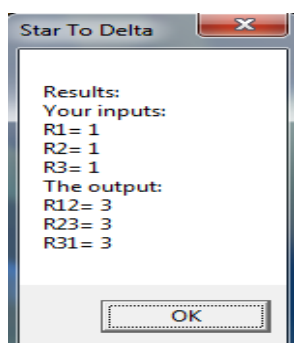

Note: If you do not input number bigger than zero, you will be asked to input the value again.

If you do not input number bigger than zero again the program will continue but, in the end, will give you error.

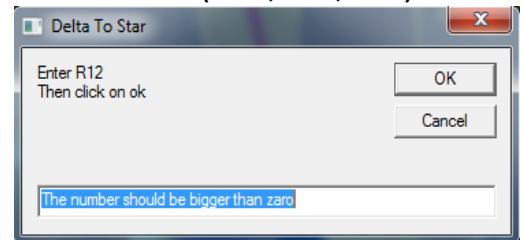

In the end if you do all the steps rightly.

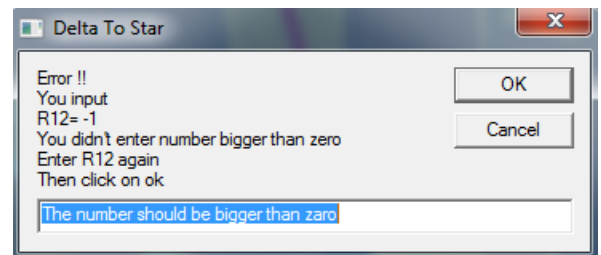

(DELTA TO STAR)(2)

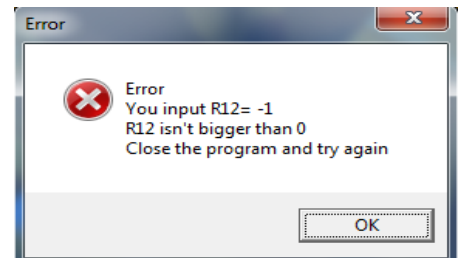

You will write the values(R12,R23,R31).

Note: If you do not input number bigger than zero, you will be asked to input the value again.

If you do not input number bigger than zero again the program will continue but, in the end, will give you error.

In the end if you do all the steps rightly.
